

Join our team in the Rosendahl office in Shanghai as a

COMMISSIONING ENGINEER

for process engineering of cable manufacturing equipment.

Rosendahl Nextrom is a leading international supplier of manufacturing solutions for the global cable and wire industry. Our core competences include extrusion, SZ-stranding and corrugation for the production of LV, MV and HV cables, automotive cables, fiber optic cables and metal communication cables. From first contact onwards, we provide customized high-quality solutions and personal support to ensure total customer satisfaction. Rosendahl is a business unit of Rosendahl Nextrom GmbH, with the Headquarter in Austria.

Job description:

- hands-on commissioning: installation, testing, operating and troubleshooting
- supporting the on-site factory acceptance testing
- troubleshooting and providing corrective actions for existing manufacturing
- customer training
- data analysis and process troubleshooting both on-site and remotely
- supporting exhibitions

Requirements:

- degree in plastics technology, mechanical engineering or a cable related discipline
- experience as commissioning engineer or chief operator
- experience in the cable manufacturing industry would be a benefit
- fluent English
- frequent domestic and international traveling to Asia and Europe

Our offer:

- machine training before your first on-site operation
- remote or on-site support from the Austrian engineers
- high-quality products
- a family-owned, successful company with a long history and leading position in its industry
- salary on market level
